

After sales service 1st level **ARKOS**

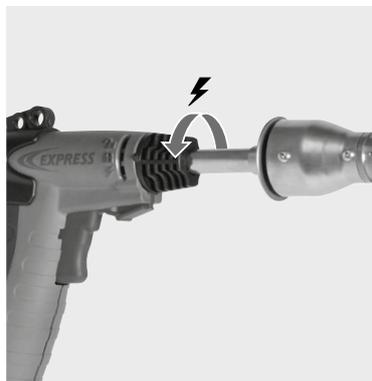

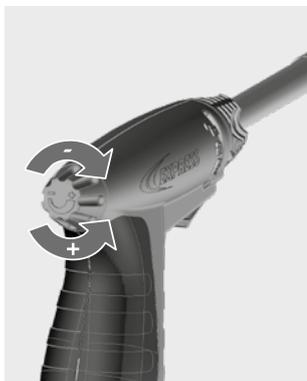

17.05.2022

Important ! Read the user manual carefully to familiarize yourself with the appliance before assembling it to its gas cartridge. Keep this manual to read it later.

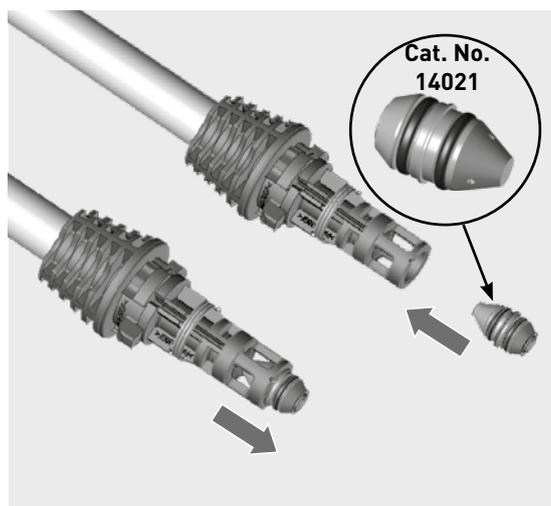

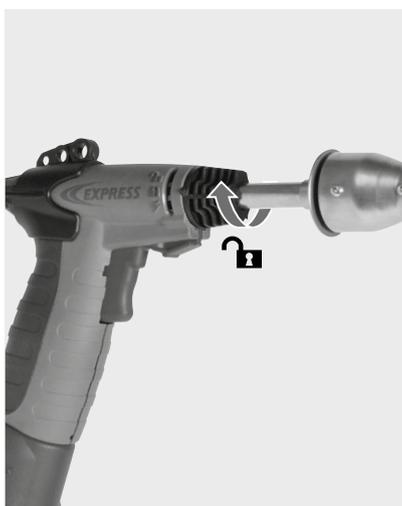

WARNING : This appliance must be used exclusively with our Express Farming gas cartridge Cat. No. 446. **It may be dangerous to use other gas cartridge.**

IF YOUR DEVICE IS NOT WORKING :

1 Open the flow wheel to the maximum by turning in the direction of the + arrow and check the the lance is in the operating « position lightening bolt ».

2 If your device still does not work : change your gas cartridge / check the condition of the seal.

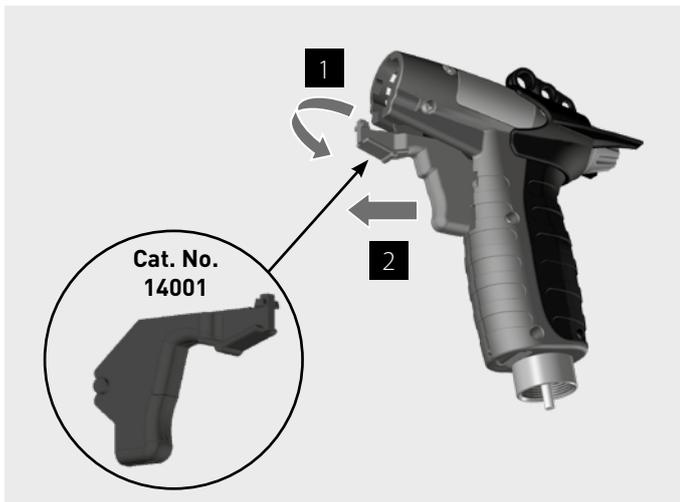

3 If your device still does not work : change the Jet/Injector.

- Remove the lance « open padlock position ».
- Extract the jet/injector, replace it with a new one, raise the lance to the « flash position » and test.

4 If your device still does not work : change the trigger + the piezo.

If the device still does not work > Return After sales service EXPRESS FARMING

If your tip/head is faulty

- Check the good condition of the Tip/head, the presence of the 2 screws.
- The device must be cold before changing or reversing the Tip/head.
- Completely unscrew the 2 screws of the Tip with the Allen key.
- Reassemble the Tip/head in the desired direction and screw the 2 screws using the Allen key, tighten the screws without excess.

This dehorner benefits from simplified self-maintenance : jet/injector and piezo removable without tools. **Never disassemble or modify the device.**
